STARS Matrix Platform

STARS multi-matrix platform is designed to be an easy to use instrument for earning money on the Internet. This platform combines multiple variants of matrix marketing, so that each partner can choose the most favorable and comfortable working conditions. The profitability of STARS platform is ensured by the network model of business development which has proved to be the most affordable, reliable and effective mechanism.

STARS Platform Basis

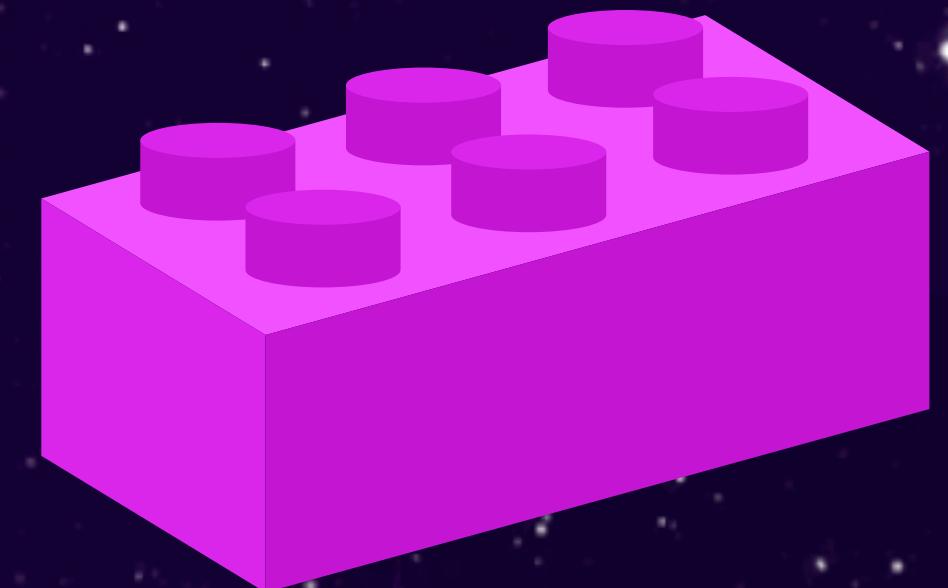

STARS multi-matrix platform was created on the basis of long-term experience the project founders had had in the network industry. In addition to embodying all advantages of well-known network projects, STARS also gained its own uniqueness. The unique feature of our project is integration of all partner and matrix programs on a single platform.

STARS multi-matrix platform is a holistic ecosystem consisting of various matrices with unique marketing programs.

BUILD-UP Function

In the process of development of the project, all "weak points" of the network industry were taken into account and comfortable working conditions were created for both professional and novice users.

The main feature of the STARS multi-matrix platform is the **BUILD-UP function**. Using this function, you can arrange partners in your structure at your sole discretion to achieve maximum profitability.

BUILD-UP function is a unique opportunity to manually manage the structure of your team, including placement of matrix links.

Idea of STARS Multi-Matrix Platform

The main idea of STARS multi-matrix platform is to bring network industry professionals together and create a platform for sharing experiences with each other.

Today, the market is literally overflowing with various offers. Network based entrepreneurs have to participate in multiple projects having different restrictions, which makes making money difficult and inaccessible and makes the barrier to entry for newcomers to the network business extremely high. That is why STARS will take making money online to a new level and build a network of entrepreneurs.

STARS Mission - our mission
is to ensure an accessible
opportunity for earning money on
the Internet without limitations.

STARS Multi-Matrix Platform provides:

- ◆ Fast and reliable mechanism for earning money;
- ◆ Various matrix marketing strategies;
- ◆ Career qualification system and award system;
- ◆ Branding personal accounts of users and their teams with their own unique styles;
- ◆ Lottery platform with prizes and various giveaways;
- ◆ Communication with all STARS partners via the personal account on the platform;
- ◆ Training in the network business school for beginners and advanced networkers.

STARS Mission - our mission
is to ensure an accessible
opportunity for earning money
on the Internet without
limitations.

STARS Marketing Rules

- ◆ Marketing scheme is filled from left to right, from top to bottom;
- ◆ When matrices are filled, money is immediately distributed in the marketing scheme.

The money is distributed according to the following priority: first money is allocated to clones, then to the referral program, then for disbursements and the remainder is saved for the next matrix;

- ◆ Clones traverse matrices and earn money in the same way as the primary slot;
- ◆ Matrices are filled and all transfers are done automatically.

Clones in the STARS structure

The STARS structure provides for automatic creation of additional slots aka clones. They serve for generation of additional income and help partners to fill matrices.

Clone is a special prototype of a slot in a matrix acquired by you.

Clone are generated automatically when a slot is closed according to the applicable matrix project marketing rules. The clones are allocated in the first matrix from left to right, from top to bottom, starting from your main account and then down to the structure below you.

Clones have all functions of the main account: they traverse matrices, generate income and create additional clones. Your supervisor also received referral bonuses from your clones.

In matrix 8, which is the final matrix, you reinvest upon closing to your structure according to the clone allocation principles.

Automatic Reinvestment in STARS (Matrix Loop-back)

Once you close Level 8, you receive your reward and continue to participate in the program.

Reinvestment means re-acquisition of a matrix model after closing it. Your partners always follow your open matrix model.

The reinvestment mechanism is applied automatically and allows you to earn more, since partners will fill your empty slots in each cycle. Once all slots in the matrix model are filled, the new one will be activated automatically.

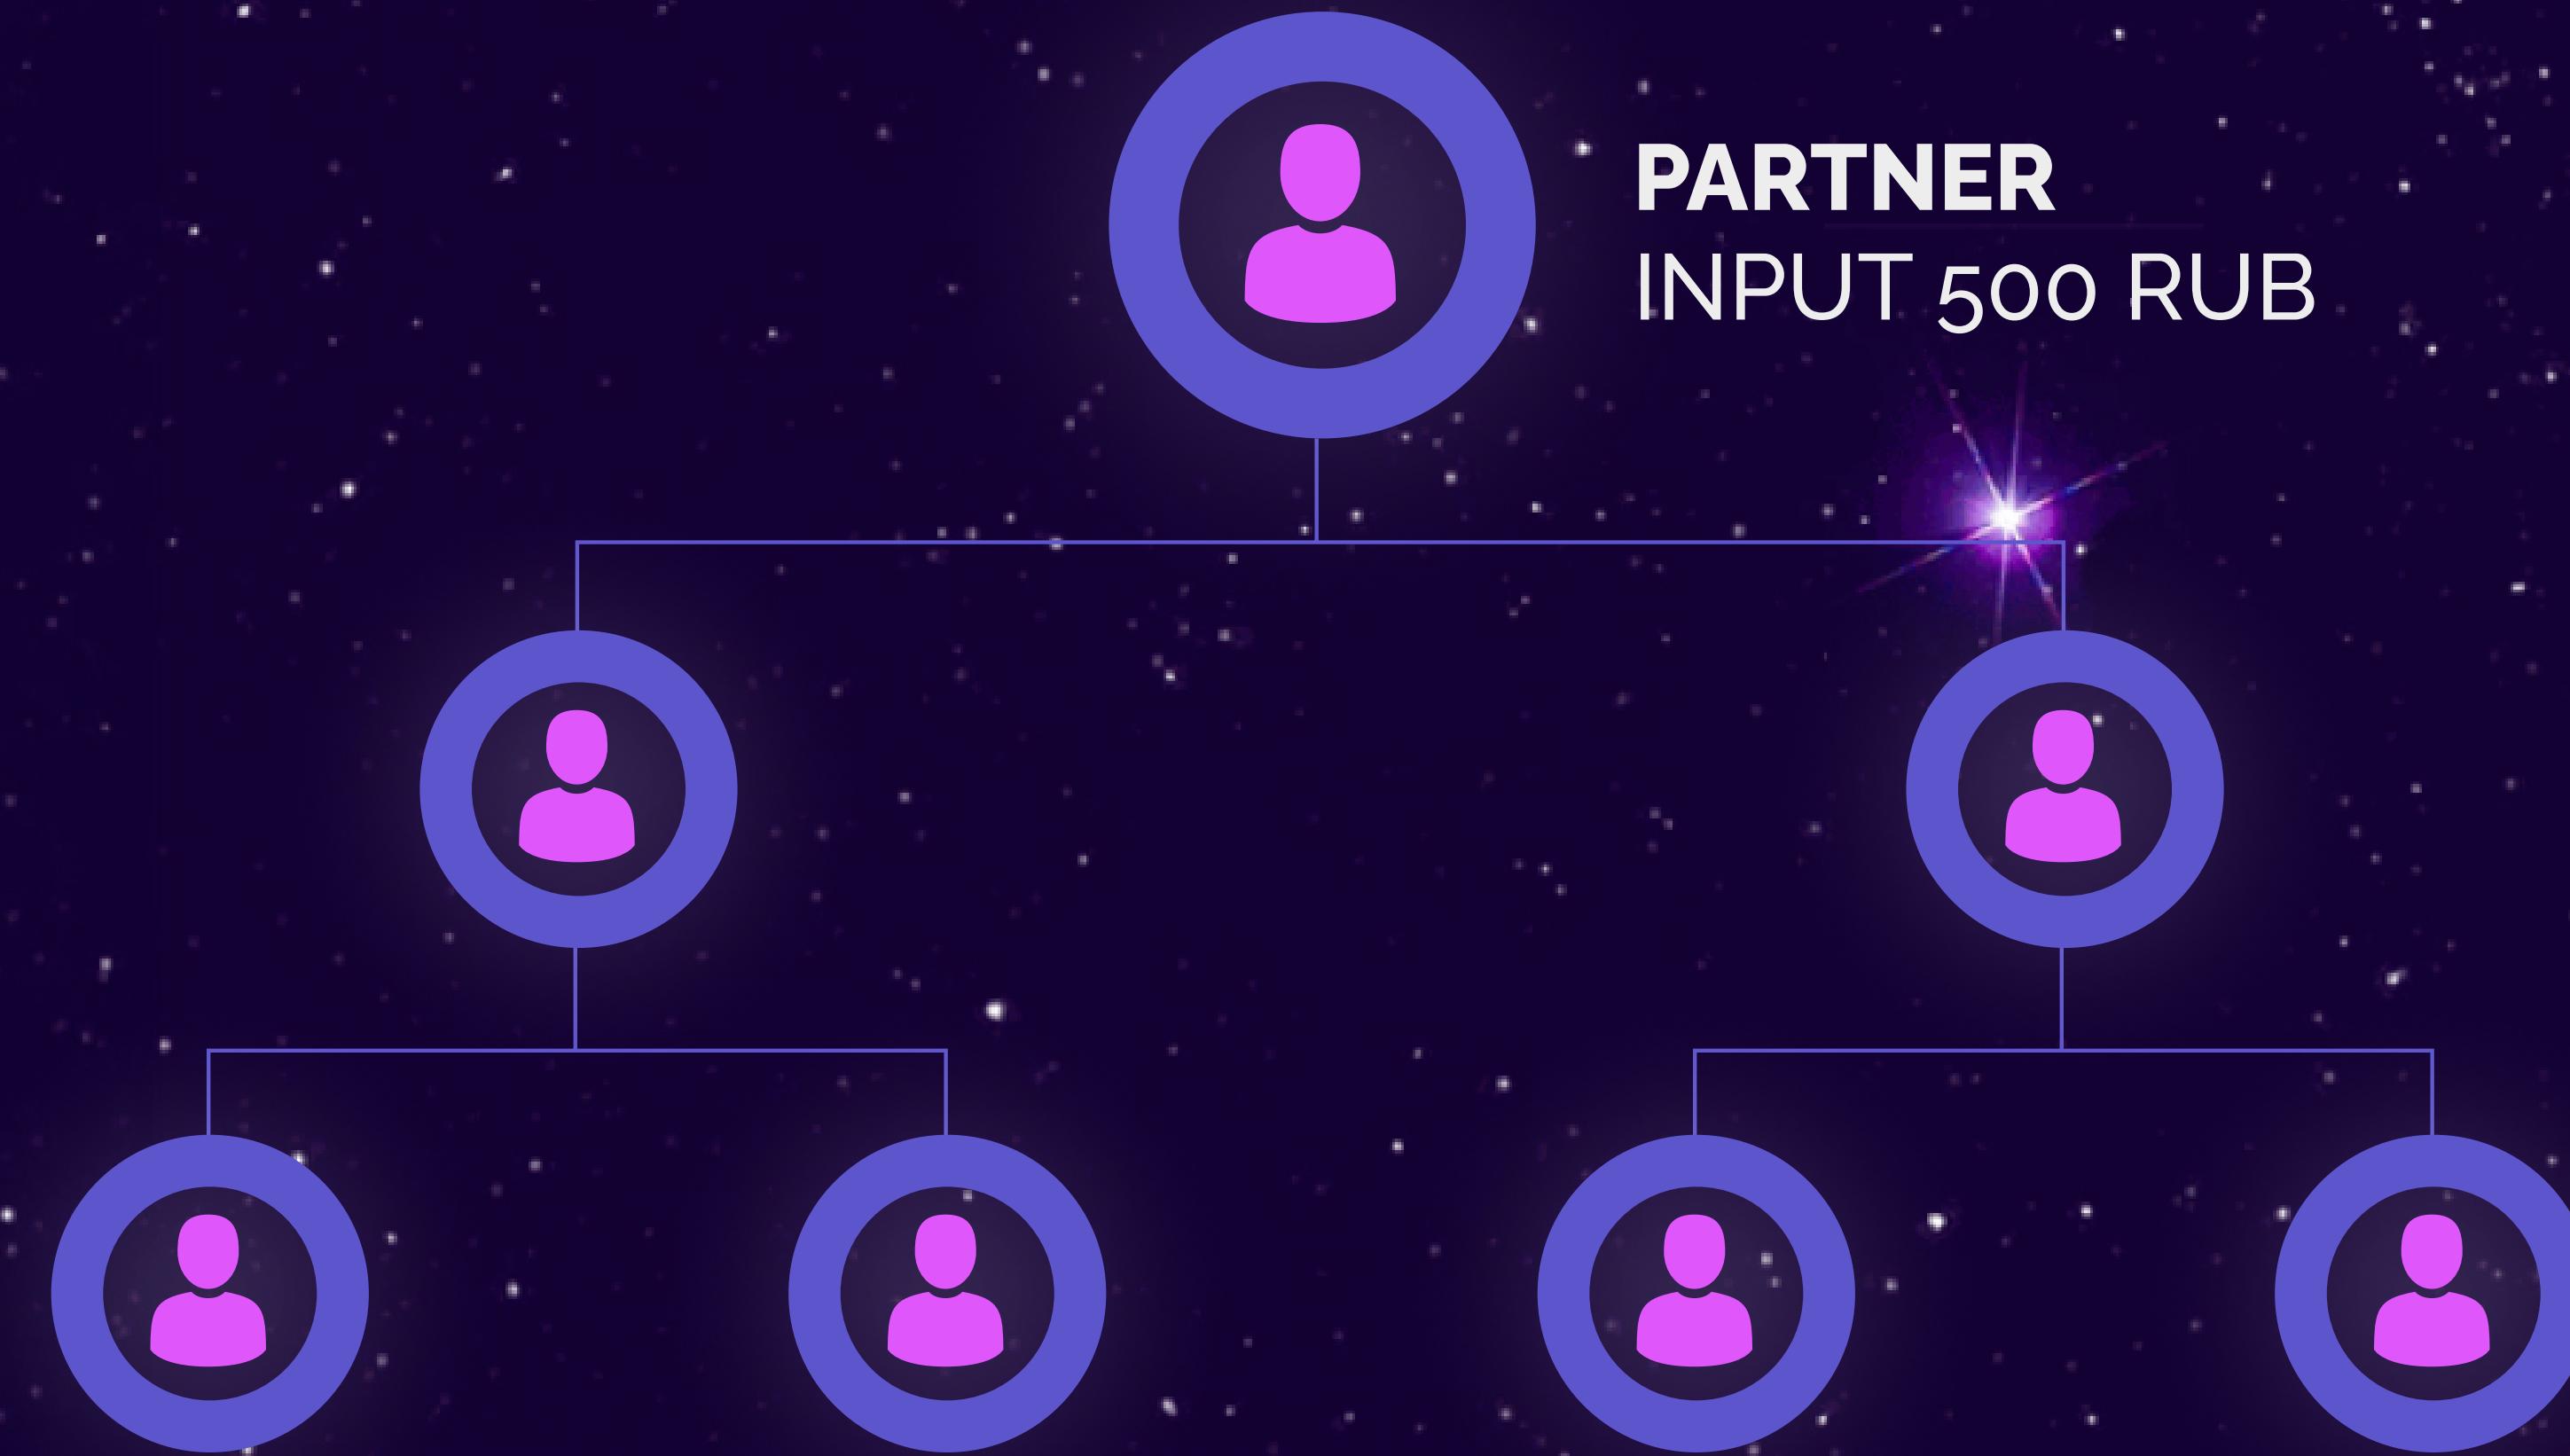

Automatic Transfer in the **STARS Structure**

When all free slots in the matrix model are filled, you will be automatically transferred to the next table. It's worth noting that STARS are not have to purchase an additional slot in the matrix, because the transfer is provided automatically and free of charge.

STARS - M8

Each partner of STARS multi-matrix platform can earn **113,000 RUB** if all tables in the matrix are closed.

The operation principle of our matrix is very simple: a partner receives total **209 clones** in M1 through traversing all tables. Each clone in turn generates real income and can traverse all tables and also earn 113,000 RUB.

The Supervisor receives at least **20,000 RUB** from each partner and the partner's clones that have completed the full cycle!
